Do You Suffer From Sinus Congestion and Hayfever?

Many people suffer in silence from allergies but allergies are not something that you simply have to put up with! It is possible to manage your allergies naturally. Common allergy symptoms include sneezing, sinus congestion, itchy eyes, persistent cough, wheezing, asthma, headaches, and skin disorders such as eczema. If you have allergies, as well as looking at symptom relief, the underlying causes such as immune imbalances or nutritional deficiencies need to be addressed in order to give you long term relief. Common causes of allergies include reacting to certain foods, food additives and pesticides, grasses and pollens, dust mites, and chemicals in personal products and cleaning products.

If you suffer from any of these symptoms, ask us for help managing your allergies today!

Herbs and Nutrients to Manage Allergies Naturally

Allergies are caused by an immune imbalance. Pharmaceutical medications may help to reduce symptoms but do not address the underlying cause. The following herbs and nutrients may help to manage symptoms of allergies naturally, as well as rebalancing your immune function.

- **Perilla (*Perilla frutescens*)** - Is a herb that is beneficial in the treatment of hayfever, asthma and sinusitis. It can be used to reduce the symptoms of allergic reactions, particularly of the upper respiratory tract.
- **Atractylodes (*Atractylodes lancea*)** - Is a herb that is beneficial for hayfever, nasal congestion, asthma, and dermatitis. It also helps the immune system to fight colds and respiratory infections.
- **Albizia (*Albizia lebbek*)** - The anti-allergy properties of the herb albizia are helpful for hayfever, asthma, sinus congestion and allergic skin conditions such as eczema and hives. It also helps to strengthen the lungs and clear mucus.
- **Quercetin** - Is a bioflavonoid vitamin that is used for acute or chronic allergies such as hayfever, hives, and asthma. It is also a great antioxidant.
- **Probiotics** - There are many different strains of probiotics; the most useful for allergies is *Lactobacillus rhamnosus* GG (LGG®). This strain has been found to be effective in reducing allergies including eczema.
- **Zinc** - Plays a very important role in regulating the immune system and is a common deficiency. Optimal zinc levels are crucial in any allergy treatment.
- **Vitamin C** - Boosts the immune system, improves lung function and decreases allergy symptoms.
- **Essential oils** - Antimicrobial essential oils such as eucalyptus, peppermint, lavender and thyme used in a sinus spray can provide relief from nasal and sinus congestion that occurs with hayfever and upper respiratory tract infections.

What Are You Putting Into Your Body?

Common food allergies include gluten, wheat, dairy, soy, eggs, and corn. If you find your allergies flare up after eating any of these foods or your diet contains a lot of these foods, you may benefit from an elimination diet. An elimination diet involves avoiding certain foods or food groups and then reintroducing them and monitoring allergy symptoms. Talk to us to see if you would benefit from an elimination diet.

These days a lot of our food contains high levels of preservatives, additives, and pesticides that can all impact on our immune systems and contribute to allergies. Think about introducing organic foods to your diet. Organic foods not only taste better, they contain higher levels of nutrients which can be beneficial to overall health.

How To Manage Your Allergy Symptoms

To help balance your immune system and help you manage your allergy symptoms, follow these simple recommendations:

- Consider a natural supplement for allergy relief.
- Avoid any foods that are known allergens.
- Increase fruit and vegetable intake, particularly those bright in colours, such as berries and capsicum, as they contain high levels of antioxidants and nutrients.
- Avoid processed and refined foods that may contain preservatives and additives.
- Drink at least 2 litres of filtered water per day to keep the body hydrated.

Call us today and start managing your allergies naturally.
